Ace Furniture uses kiln dried beech in the manufacture of all wooden frames.

Beech wood is a hard, strong and heavy wood. It has a fine, tight grain and even texture.

Beech wood is very light in colour so takes polish well, it has a high shock resistance.

Ace Furniture uses **"intelligent, antimicrobial"** fabrics in our upholstery. An antimicrobial fabric is one that has additives introduced into a textile during the manufacturing process to make it resistant to microbes. The antimicrobial fabrics will not support microbial or fungal growth and have been proven to be effective against Salmonella, Clostridium difficile, E. Coli, MRSA and **Corona Virus**. All fabrics can be cleaned and sterilised to aid infection

Furniture showing this symbol can be filled with sand or concrete blocks for extra weight to meet individual customer requirements.

All fabrics used in the upholstery of any of our furniture are fire retardant and conform to the British Standard BS5852 CRIB 5.

Crib 5 our standard Healthcare fabric

Performance Standard BS7176 – MEDIUM HAZARD - Tested to cigarette (EN1021-1) and match ignition sources (EN1021-2 and CRIB 5 (BS5852) sources.

(For hotels, public buildings and most healthcare environments)

Crib 7 available upon request

Performance Standard BS7176 – HIGH HAZARD - Tested to cigarette (EN1021-1) and match ignition sources (EN1021-2 and CRIB 7 (BS5852) sources.

(For prisons and some hospital environments)

We have a vast selection of healthcare fabrics, vinyls and faux leathers in both plain and patterned designs, making your establishment unique to your own requirements.

Contact the sales office for our upholstery binder.

Anti-tamper screws are used in place of conventional screws in certain areas of furniture assembly such as fixing table tops to bases and are distinguished by having an unconventional "head", making tampering with the screw more difficult, if not impossible without the matching screwdriver.

Chairs showing this symbol can have skis added as an optional extra.

The skis are flat and designed for sliding the chair and assisting the movement of the chair across the floor.

All Ace Furniture products hold a 5 year structural warranty.

Ace offer a range of 12 standard colours to choose from to polish on all wooden chair frames, tables and sofa legs, please contact the sales office for a colour chart. We can also offer a bespoke colour match service so suit individual customer requirements.

Ace Furniture uses a biocidal wood lacquer in the finishing of all wood work. The lacquer we use provides that extra protection needed in the healthcare and hospital environments. The Biocidal polish kills most species of bacteria, including MRSA, Salmonella, Corona Virus and E.coli and it goes on killing them for the lifetime of the laquer - as long as 10 years. The lacquer prevents the bacteria's access to nutrients so they starve and die. It has a kill rate of 99.9% over a 24 hour period.

The Biocidal polish is approved by the FDA, HSE and EPA and certified BS6250. It has been tested by Bodycote Lawlabs against a range of bacteria and by FDAS against C. difficile. The Biocidal polish has received a point 3 award from the NHS Infection Control Rapid Review Panel (Surface Coating Category).

Furniture showing this symbol are all manufactured with reinforced frames and are plywood lined for extra strength and durability making this furniture suitable for Challenging Environments.

Our furniture has been tried and tested for many years in various establishments making them a preferred choice.

Ace Furniture uses Combustion Modified High Resilient (CMHR) FIRE RETARDANT FOAM that conforms to BS EN 1021:1 & 2 and CRIB 5 Medium Hazard BS 7176 on **all** upholstered furniture.

Furniture showing this symbol are made from solid high density CMHR foam with no wooden frame.

The fabric/vinyl is completely sewn with no staples making them ideal for secure environments.

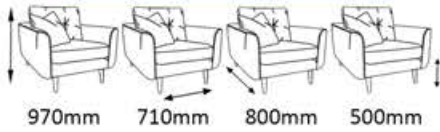

These are stock items and have a 7 day turn around from confirmation of order.
